

HOSPICE AND PALLIATIVE CARE OF THE WOOD RIVER VALLEY ANNUAL REPORT- 2021

Since 1985 our hospice has delivered excellent hospice and palliative care services in a rural area. Our work has been recognized nationally. We are committed to our mission, to being involved in the community and to working tirelessly at the frontier of helping individuals better understand end-of-life through community education and strong partnerships. We will continue in these endeavors in the upcoming year along with our intent to continue to develop the electronic health medical record to better meet our needs, increase community awareness through education and marketing, and solidify our practices with the involvement of our Professional Health Advisory Committee along with strategic planning for our future. We continue to prioritize professional competency development amongst our staff as another way we feel we can be practically committed to our mission and plan to not only focus on education but on the development of the newest roles to our team. We will continue to respond to our community's needs and wishes and provide competent and compassionate care to individuals when they need it.
